Contents Volume 59 1999

Volume 59 No. 1 January 1999

Regular papers

The effects of O_3 fumigation during leaf development on photosynthesis of wheat and pea: An *in vivo* analysis
P.K. Farage, S.P. Long **1–7**

Mutations that modify or exclude binding of the Q_A ubiquinone and carotenoid in the reaction center from *Rhodobacter sphaeroides*
J.P. Ridge, M.E. van Brederode, M.G. Goodwin, R. van Grondelle, M.R. Jones **9–26**

Energy storage and optical cross-section of PS I in the cyanobacterium *Synechococcus* PCC 7002 and a *psaE*⁻ mutant
D. Charlebois, D. Mauzerall **27–38**

Genes encoding light-harvesting and reaction center proteins from *Chromatium vinosum*
G.E. Corson, K.V.P. Nagashima, K. Matsuura, Y. Sakuragi, R. Wettasinghe, H. Qin, R. Allen, D.B. Knaff **39–52**

Protochlorophyllide-NADP⁺ and protochlorophyllide-NADPH complexes and their regeneration after flash illumination in leaves and etioplast membranes of dark-grown wheat
F. Franck, B. Bereza, B. Böddi **53–61**

Rapid light curves: A new fluorescence method to assess the state of the photosynthetic apparatus
A.J. White, C. Critchley **63–72**

Stimulation of the diadinoxanthin cycle by UV-B radiation in the diatom *Phaeodactylum tricornutum*
R. Goss, H. Mewes, C. Wilhelm **73–80**

Heat sensitivity of chloroplasts and leaves: Leakage of protons from thylakoids and reversible activation of cyclic electron transport
N.G. Bukhov, C. Wiese, S. Neimanis, U. Heber **81–93**

Functional LH1 antenna complexes influence electron transfer in bacterial photosynthetic reaction centers
R.W. Visschers, S.I.E. Vulto, M.R. Jones, R. van Grondelle, R. Kraayenhof **95–104**

Volume 59 Nos. 2–3 March 1999

Minireview

Subunit control of Rubisco biosynthesis – a relic of an endosymbiotic past?
S. Rodermel **105–123**

Regular papers

Light-induced and osmotically-induced changes in chlorophyll *a* fluorescence in two *Synechocystis* sp. PCC 6803 strains that differ in membrane lipid unsaturation
G.C. Papageorgiou, Govindjee, R. Govindjee, M. Mimuro, K. Stamatakis, A. Alygizaki-Zorba, N. Murata **125–136**

The ϵ subunit of the chloroplast ATP synthase of *Pisum sativum*
N.M. Buckley, J.A. Cruz, W.S. Cohen, R.E. McCarty **137–145**

Electron transfer between cytochrome c_2 and the tetraheme cytochrome *c* in *Rhodopseudomonas viridis*
J.M. Ortega, F. Drepper, P. Mathis **147–157**

Light intensity effects on pigment composition and organisation in the green sulfur bacterium *Chlorobium tepidum*
C.M. Borrego, P.D. Gerola, M. Miller, R.P. Cox **159–166**

Hg^{2+}, Cu^{2+}, and Pb^{2+}-induced changes in Photosystem II photochemical yield and energy storage in isolated thylakoid membranes: A study using simultaneous fluorescence and photoacoustic measurements
N. Boucher, R. Carpentier **167–174**

Light-induced excitation quenching and structural transition in light-harvesting complex II
W.I. Gruszecki, W. Grudzinski, M. Matula, P. Kernen, Z. Krupa **175–185**

Feedback inhibition of photosynthesis in rice measured by O_2 dependent transients
J. Sun, G.E. Edwards, T.W. Okita **187–200**

Dependence of catalase photoinactivation in rye leaves on light intensity and quality and characterization of a chloroplast-mediated inactivation in red light
W. Shang, J. Feierabend **201–213**

The role of ascorbate in the protection of thylakoids against photoinactivation
G. Forti, R.P. Barbagallo, B. Inversini **215–222**

Effects of mutagenesis on the detailed structure of spheroidenone in the *Rhodobacter sphaeroides* reaction centre examined by resonance Raman spectroscopy
A. Gall, J.P. Ridge, B. Robert, R.J. Cogdell, M.R. Jones, P.K. Fyfe **223–230**

Evidence for spatially separate bacteriochlorophyll *c* and bacteriochlorophyll *d* pools within the chlorosomal aggregate of the green sulfur bacterium *Chlorobium limicola*
D.B. Steensgaard, C.A. van Walree, L. Bañeras, C.M. Borrego, J. Garcia-Gil, A.R. Holzwarth **231–241**

Electron transfer between the spinach plastocyanin mutant Leu12His and Photosystem 1
K. Sigfridsson **243–247**

Historical corner

On the requirement of minimum number of four versus eight quanta of light for the evolution of one molecule of oxygen in photosynthesis: A historical note
Govindjee **249–254**

Letter to the editor

Nomenclature of metal-substituted (bacterio)chlorophylls in natural photosynthesis: Metal-(bacterio)chlorophyll and M-(B)Chl
S. Takaichi, N. Wakao, A. Hiraishi, S. Itoh, K. Shimada **255–256**

Book review **257–258**

Contents Volume 59 **259–260**

Author index Volume 59 **261**
